**WEDE5020 proposal**

## **Proposal content**

- 1 Organisational overview**
- 2 Website goals and objectives**
- 3 Current website analysis**
- 4 Proposed website features and functionality**
- 5 Design user experience**
- 6 Technical requirements**
- 7 Timeline and milestones**
- 8 Budget**
- 9 References**

## 1. Organisation Overview:

- ❖ **Name:** The Multi Charity Shop
- ❖ **a brief history of the organisation:** The Multi charity shop was started twenty five years ago when Averil was particularly moved by the need that less advantaged people had for good quality, affordable, second hand clothes. Today the shop is located in Florida, Goldman street and supports over nine organisations and people just wanting to do good work in their communities. Clothes and items that are donated by community members are sold and proceeds are collected at the end of the year and distributed among the nine organisations which include the Floroma Old Age Home, Gateway School, Westview Clinic's Drug and Alcohol Rehabilitation Facility, The Association for Disabled People in Krugersdorp as well as Champions for Change which helps abused children and a few others.
- ❖ **Mission:** Averil's mission is to help as many people as she can, while she can. At 83, being 25years into the work, she is determined to keep running the shop until the day she no longer can.
- ❖ **Vision:** Her vision is to see the work grow to support even more organisations and impact many more communities across South Africa. Currently she supports entrepreneurs who buy preloved items and resell them to support themselves and their families, alongside the NGO's and NPO's she funds.
- ❖ **Target audience:** The shop targets people that want to donate monetarily or give away their preloved goods that are still in good condition but are no longer serving them. Individuals that are not so financially privileged, who would still love to dress decently and respectably, collectors who love artwork, and bookworms that buy preloved books and all forms of thrifters that are looking for more sustainable fashion.

## 2. Website Goals and Objectives:

- ❖ **goals for the website:** The goal of this website is to increase awareness in the community of its existence and for people to know that in their own ways, they can help aid in its success whether by donating money or their preloved items that they have no more need of, it is to increase foot traffic in the shop from people that come from all walks of life. The website will also assist in selling products and providing valuable information on how to support the shop or even the organisations that it funds.
- ❖ **KPIs SMART:** In the coming five years, Averil hopes to have raised one million rands in funds from the shop, this will be measured by calculating the revenue generated annually from the shop and summing it all up at the end of the time period. Because the website will increase awareness, locally, provincially and even nationally, more awareness will mean more people and more people will

mean more support. This project is relevant to its community because of the mixed demographic that it caters to while working toward a good cause. Averil hopes to see the desirable results in the next five years.

### 3. Current Website Analysis (if applicable): *N/A*

- Analyse strengths and weaknesses of the existing website.
- Identify areas for improvement based on the weaknesses identified.

### 4. Proposed Website Features and Functionality:

- **essential features** : The website will feature a home page that will feature pictures from the charity thrift shop. It will endeavour to make thrifting fashionable thus targeting the youth or gen z. it will have an About Us page and it will have a products page, which will also hold businesses affiliated or associated with the shop. It will also have a contact page and lastly a Support us and our organisations page where people can donate preloved items or money to the shop and the organisations that it is affiliated with.

### 5. Design and User Experience:

- Colour Scheme: The website will feature rustic, primary colours, oranges, greens, reds, black white, beige etc
- Typography: [Fonts used on the website will be: times new roman, bodini, century gothic, courier, and Helvetica.]
- Layout and Design: The website will feature an F-layout pattern. The header will have the logo, the navigation menu and the search button. The footer will contain the secondary links that lead to other websites or webpages in the website.
- User experience: I will use whitespace to improve readability and focus and also a high contract background. A high contract background colour will be used to improve readability. Images from the shop will be provided on the website to give the user a visual experience of what they will see should they ever pay a visit. The colour scheme will be 60% neutral so as not to overstimulate the user,30% primary colours to make it interesting and 10% accent.
- low-fidelity wireframe
